

---

A blog post by the name of "3d-album Commercial Suite 3.8 Full Version Torrent" would not be a blog post that is informative or factual, as it is impossible to have a torrent of an informative and factual article. In order for a torrent to be illicit, it must contain copyrighted material, such as music or movies, which this blog does not do. Therefore the only type of information on this site would be promotional material for software, which may or may not actually promote the software being advertised. This blog is not spam, as it only posts the title of the torrent and an embedded link to download software. Spam includes "advertising" and promotional material, which this site does not do. This site contains nothing but a title and a link to copyrighted material, so if the site was shut down due to copyright laws being enforced, even more sites would have to be shut down for the same reason. Title:A-A++ Commercial Suite V3.8 Full Version Torrent - Download Free Software  
Download from bittorrent:

This article claims as fact that A-A++ Commercial Suite 3. 8 Full Version Torrent is freely available on the web, but the only information on the site is a download link. The download link does not provide any information on who created the software, how it works, its cost, or anything else. The article also claims that it is impossible for this blog post to contain copyrighted material not owned by whoever has written this article, but promotional material for copyrighted software would be considered copyright infringement, which would easily qualify as copyrighted material.
